

Brevin Tilmon

Room 425B, 1064 Center Dr, Gainesville, FL 32611. – btilmon@ufl.edu – btilmon.github.io

RESEARCH STATEMENT

I am interested in computational photography, computer vision and machine learning. Part of my research involves developing hardware/software prototypes that combine deep learning and camera hardware.

EDUCATION

University of Florida *2019.8 - Present*
PhD, Electrical Engineering
Advisor: Prof. Sanjeev Koppal

Murray State University *2015.8 - 2019.5*
B.Sc., Engineering Physics, GPA: 3.8/4.0

PUBLICATIONS

1. Brevin Tilmon, Eakta Jain, Silvia Ferrari, Sanjeev Koppal. [FoveaCam: A MEMS Mirror-Enabled Foveating Camera](#). **International Conference on Computational Photography (ICCP 2020)**.
2. Francesco Pittaluga, Zaid Tasneem, Justin Folden, Brevin Tilmon, Ayan Chakrabarti, Sanjeev Koppal. [Towards a MEMS-based Adaptive LIDAR](#). **International Conference on 3D Vision (3DV 2020)**.
3. Kristofer Henderson, Xiaomeng Liu, Justin Folden, Brevin Tilmon, Suren Jayasuriya, Sanjeev Koppal. [Design and Calibration of a Fast Flying-Dot Projector for Dynamic Light Transport Acquisition](#). **IEEE Transactions on Computational Imaging (TCI 2020)**.

EXPERIENCE

University of Florida *2019.8 - Present*
FOCUS Lab
Research Assistant, Advisor: Prof. Sanjeev Koppal

Project 1: Foveating Cameras (Publication [1](#))

- Developed a camera whose field of view is intelligently modulated with a MEMS mirror. Showed performance increases for computer vision tasks with less pixels thanks to resolution distribution.

University of Florida *2018.5 - 2018.8*
FOCUS Lab

Undergraduate Research Intern (SURF Program), Advisor: Prof. Sanjeev Koppal

- Developed a projector-camera system for active light transport imaging. See publication [3](#).

Murray State University
IEEE Robotics Team
President

2016.11 - 2019.5

- Led the design and implementation of fully autonomous robots for competition at the IEEE SoutheastCon hardware competitions. Organized outreach activities for under represented students at surrounding high schools in STEM. Contributed to NASA grants awarded to fund our team.

AWARDS

NSF GRFP Honorable Mention	2020
Graduate School Preeminence Award , University of Florida	2019-2024
Kirkland Fellowship , University of Florida	2019-2021
Jesse & Deborah Jones Scholarship , Murray State University	2015-2019
Housing Scholarship , Murray State University	2015-2018

SKILLS

Programming: C/C++, Python, MATLAB

Sensors and Robotics: Machine vision and depth cameras, Embedded Systems, Optics Bench
