

# Brevin Tilmon

<b>Personal</b>	Personal Website, Github, Google Scholar Email: brevinjt@gmail.com Phone: 812-568-3344	
<b>Education</b>	University of Florida Ph.D. Electrical and Computer Engineering Murray State University B.S. Electrical Engineering	05/19-Present  08/15-05/19
<b>Experience</b>	<b>Snap Inc.</b> Research Intern, Computational Imaging Group Developed state-of-the-art energy-efficient holographic 3D sensor for computer vision on Snap's augmented reality glasses. Built real-time self-contained hardware prototype with CUDA and C++ on an embedded NVIDIA Jetson Nano. Released associated CUDA library on GitHub. Published results in CVPR 2023 and submitted patent. [Project Website] <b>Meta</b> Research Intern, Reality Labs Developed machine learning model for selective depth sensing on Meta's AR/VR devices. The algorithm achieves better virtual object occlusion than classic stereo depth algorithms at similar runtimes. Leveraged Meta's production machine learning infrastructure (distributed training, model quantization, large synthetic and real datasets). Submitted patent. <b>NASA</b> Research Intern, Intelligent Robotics Group Developed CUDA simulator and dataset to improve generalization of a computational imaging microscope in development for autonomous reflectance capture in space. Put another way, the microscope will serve as a robot geologist in space. [Dataset Link] <b>University of Florida</b> Graduate Research Assistant, Florida Optics and Computational Sensor Lab Developed computer vision algorithms and computational imaging systems for efficient computer vision applications. [Personal Website]	05/22-12/22  08/21-12/21  05/21-08/21  05/19-Present
