Background

Research and development of new imaging sensors to improve computer vision. Developing computer vision, computer graphics, and machine learning software and novel hardware (optics, electronics) solutions for sensors in embedded environments. Solid software engineering experience with exposure to high performance computing on CPU and GPU.

Education

University of Florida PhD, Electrical and Computer Engineering	5/2019 - 5/2023 (expected)
Murray State University BS, Engineering Physics	8/2015 - 5/2019

Experience

Snap Inc. Research Intern, Computational Imaging Team Developing novel 3D sensors to improve 3D reconstruction on mobile devices.	5/2022 - Present
Meta Research Intern, Reality Labs Developed dynamic occlusion prediction algorithm based on stereo cameras and machine learning.	8/2021 - 12/2021
NASA Ames Research Center Research Intern, Intelligent Robotics Group Improved 3D reconstruction capabilities of embedded computational microscope.	5/2021 - 8/2021
University of Florida Graduate Research Assistant, Florida Optics and Computational Sensor Lab Research and development of computer vision algorithms and efficient cameras, projectors, and LIDAR sensors.	5/2019 - Present

Selected Publications, Patents, Open Source Software
