Phone: 812-568-3344

Background

Research and development of new imaging sensors to improve computer vision. Developing computer vision, computer graphics, and machine learning software and hardware (optics, electronics) solutions for sensors in embedded environments. Software engineering experience in C++, Python, PyTorch, OpenGL and CUDA.

Education

University of Florida 5/2019 - 5/2023 (expected)
PhD, Electrical and Computer Engineering

Murray State University 8/2015 - 5/2019
BS, Engineering Physics

Experience

Snap Inc. 5/2022 - Present
Research Intern, [Computational Imaging Team](#)
Developing novel 3D sensors to improve 3D reconstruction on mobile devices.

Meta 8/2021 - 12/2021
Research Intern, [Reality Labs](#)
Developed dynamic occlusion prediction algorithm based on stereo cameras and machine learning.

NASA Ames Research Center 5/2021 - 8/2021
Research Intern, [Intelligent Robotics Group](#)
Improved 3D reconstruction capabilities of embedded computational microscope.

University of Florida 5/2019 - Present
Graduate Research Assistant, [Florida Optics and Computational Sensor Lab](#)
Research and development of computer vision algorithms and efficient cameras, projectors, and LIDAR sensors.

Selected Publications, Patents, Open Source Software
